# WHAT IS OptiPLUS?

OptiPLUS by Lumenis is a groundbreaking, FDA-cleared device that uses dual frequency RF technology to deliver heat across different skin layers.

Next to pain relief for sensitive eyes, patients enjoy improved meibomian gland functionality, enhanced blood circulation, and increased collagen production<sup>1,2,4</sup> for radiant, glowing skin.

Designed for all skin types, OptiPLUS ensures optimal contact with every delicate curve around your eyes, providing a safe, comfortable experience.<sup>6</sup>

# WHAT CAN I EXPECT FROM THE OptiPLUS TREATMENT?

## QUICK, COMFORTABLE TREATMENTS

After applying RF cream, your physician will use electrodes to gently treat the area.

Clear results in 4 OptiPLUS sessions, spaced two weeks apart.

One follow-up appointment four weeks after the fourth treatment.<sup>4</sup>

Each quick OptiPLUS treatment is around 6 minutes per side.

# GENTLE, FAST, NO-DOWNTIME

Immediately following treatment, you may experience some redness, which usually disappears within a few hours. In most cases, you can return to your daily activities and apply makeup straight away.

Maintenance treatments are usually recommended every 6-12 months to ensure long-term results.

## RISK INFORMATION

Like with all medical procedures, OptiPLUS RF treatments may not be suitable for all patients. Make sure to consult your treatment provider to make sure OptiPLUS is the right choice for you. Caution is advised for patients who: take medications that increase skin sensitivity to heat or change skin metabolism, have active skin infections, any inflammatory skin conditions or skin cancers, have any disease that increases skin temperature, wear pacemakers or any type of implanted electronics, have nerve insensitivity to heat in the area to be treated, wear piercings in the area to be treated, have allergies to any of the coupling cream ingredients or are pregnant. The device is not intended to be used within the orbital rim or on the neck. Please refer to the operator manual for a complete list of intended use, contraindications, and risks.
